OHero

An open source adventure

Problem Space

OpenStreetMap (OSM) is simply an open source map with over 9 million monthly users.

Correcting issues on the OpenStreetMap.

An OSM Issue refers to a wrongly classified OSM Tag.

How to incentivize people to correct issues in the OSM? Gamify!

OHero

- MMORPG mobile AR Game
- Backend Server
- ML Engine | +95% Accuracy
- Automated solution for the OSM Issues

Business Idea and Financing

There are different ways to support OpenStreetMap Foundation, individually and as a corporate.

Corporates can provide vouchers and other rewards to daily, weekly winners.

The new Corporate Membership tiers: Annual fees and benefits		
Corporate Membership tier	**Membership fee**	**Benefits**
Supporter	€500 / year	• Your name on the OSMF web site • Show support for the OSM Foundation • Attend OSMF General Meetings
Bronze	€1,500 / year	All supporter level benefits, plus: • First access to SotM sponsorship opportunities • Name and logo on OSMF web site

Current model. This is clearly bad!

Conclusion

Solving OpenStreetMap issues turned into a fun adventure!

Win, win, win! Users will have fun, open-source supporter companies will be better advertised and the issues will be solved.
